

Universal Basic Income

v2

October 15, 2024

nigel@freedomdividendcoin.io

The next goal of the project is real Universal Basic Income. A self-funded system like Bitcoin. Built like a nuclear reactor so it can run on its own. A Stablecoin disbursed monthly. With proof of personhood verification.

I have been running simulations all of 2024. The launch estimate is early 2025. An initial version will be improved upon by myself and others. This will be open-source.

Pros

Monthly Stablecoin disbursements to people

Optional if private sector makes UBI

Cons

Will take 10 years to get global adoption

This is an experiment. v1 of the token will remain as is. v2 will launch a UBI Stablecoin.
